

FieldGenius 2012 – 6.0.1.6 Service Pack 1 Release Notes

June 15, 2012

Release Notes

This service pack **does not** require a new license key if you are upgrading from 6.0.0 (or higher). You will require a new license key if upgrading from an older version of FieldGenius.

Important Note: If you are not using a NavCom receiver, or a device with either the Windows Mobile 5 or PocketPC operating systems, then there is no compelling reason to install this service pack. This service pack only impacts the above mentioned devices/operating systems.

What's new in FieldGenius 2012 Service Pack 1, Version 6.0.1.6

This service pack addresses and fixes two issues.

1. Our Windows Mobile 5/PocketPC build had a problem with the display driver that prevented points from being displayed on the map.
2. We fixed a latency issue specific to NavCom GPS drivers and the local internet connection.
